

Presentation and goals

Natural compounds continue to play an important role in the discovery and development of new pharmaceuticals, as clinically useful drugs, as starting materials to produce synthetic drugs, or as lead compounds from which a totally synthetic drug is designed. At the same time, synthetic compounds, unrelated to natural products, have played an increasingly progressive role in new drug discovery.

The 3rd African Congress on Biology and health (ACBH 2025) will bring together academic and industrial leaders to discuss new breakthroughs in science and be given significant opportunities to interact with each other in the fields of natural and chemical products, their biological activities, safety and toxicity... This scientific conference will attract a diverse array of participants and create opportunities for emerging young investigators to interact with experts in the field.

Important dates

Due date for abstracts submission: **1st September 2025**
Acceptance notification: **15th september 2025**
Program announcement: **1st october 2025**

 Dr. MOSBAH Asma (Constantine-1, University, Algeria)

Topics

● Biological activities of natural and synthetic substances

● Purification and characterization of natural substances

● Toxicity and safety of natural and synthetic compounds

● Molecular docking of bioactive compounds

● Valorization of food byproducts

● Food security and environmental sustainability

● Open free topics (Biology and health)

inscription fees

PhD students : 5000 DA

Academic / Researchers : 10000 DA
